EDUCATION

Hanoi University of Science and Technology (HUST)

Bachelor of Information Technology
(Vietnam – Japan Program)

GPA: 3.2 / 4.0

Expected Graduation: 2026

TECHNICAL SKILLS

Backend

Java 17, Spring Boot 3, Spring Security,
JPA/Hibernate, RESTful API, JWT,
OAuth2, RBAC

Frontend

React 18/19, TypeScript, Redux Toolkit,
Vite, Tailwind CSS

Database & Caching

MySQL, Pinecone Vector DB

AI & System Integration

Spring AI, RAG, LLM Integration

DevOps & Testing

Docker, GitHub Actions (CI/CD), JUnit 5,
Mockito

Tools

Git, GitHub, Swagger/OpenAPI, Postman

Core Knowledge

OOP, SOLID Principles, Design Patterns,
Data Structures & Algorithms

LANGUAGE

- Japanese (~ N3)
- English ((Technical Document Comprehension)

PROJECT EXPERIENCE

JobFind – AI-Powered IT Job Search Platform

GitHub: github.com/HoangCongTungK17/DATN_2026

Full-stack job search platform with AI-driven recommendation system built using Spring Boot and React.

Key Contributions:

- Designed and implemented 30+ RESTful APIs, enabling modular backend services and reducing feature integration time by ~25%.
- Architected RBAC authentication system supporting multiple user roles, ensuring secure access control and preventing unauthorized data exposure.
- Integrated AI-powered job recommendation engine using RAG, improving job-skill matching accuracy and enhancing user engagement experience.
- Built email notification system serving 100+ test users, automating personalized job alerts and reducing manual search effort.
- Applied caching strategies to optimize frequent database queries, reducing average API response time.
- Structured backend using layered architecture and SOLID principles to improve maintainability and scalability for future feature expansion.

Tech Stack: Java 17, Spring Boot 3, Spring Security, MySQL, React 18 (TypeScript), Redux Toolkit, Pinecone, Swagger

Disaster Response & Management System (PWA)

GitHub: github.com/HoangCongTungK17/disaster-response-management-system

Progressive Web Application for emergency coordination and disaster management.

Key Contributions:

- Developed full-stack system with real-time SOS request handling
- Designed JWT-based authentication with Two-Factor Authentication (Email OTP)
- Integrated geolocation tracking using Leaflet Maps
- Built admin dashboard with real-time analytics for resource allocation
- Implemented role-based access control system for multi-level users

Tech Stack: Java 17, Spring Boot 3, React 19, MySQL, Tailwind CSS, Leaflet, Recharts

Additional Projects

Apartment Management System – CRUD-based full-stack web application

LapHub – Laptop E-commerce Platform

- Implemented product management and order processing
- Integrated AI chatbot for product recommendations
